

VAPING NICOTINE + MENTAL HEALTH

Nicotine has not been found to directly cause mental health conditions, but numerous studies reveal troubling links between **vaping nicotine** and worsening symptoms of **depression and anxiety**.

Nicotine can amplify **anxiety** symptoms^{1,4} and feelings of **depression**.²

81% of 15-24 year olds surveyed who had used **e-cigarettes** said they started vaping to decrease stress, anxiety, or depression.³

Irritability, anxiety and depression are some of the symptoms of nicotine withdrawal. **Vaping** nicotine relieves these symptoms, **but only temporarily**.

Quitting nicotine can lead to reduced **stress, anxiety, and depression** in the long term.³

90% of those who quit **vaping** said they felt less stressed, anxious, or depressed.³
